

## LBS ASPEN BEDDING

High quality dust-free, absorbent bedding made from debarked chopped Aspen wood (populus tremula), high temperature dried and sifted.

- From PEFC accredited manufacturing site
- Reliable and consistent source of supply
- Natural raw material from sustainable source
- Purpose made, from untreated selected Aspen
- Batched certificate of analysis
- Biodegradable
- Natural odour absorption, improvement of room climate: liquids are absorbed, thus preventing bonding with oxygen from air, the formation of unpleasant odours is significantly slowed
- High absorbency: special cutting of the wood chips ensures that liquids are absorbed by the wood chip rather than bonded to the surface.
- Bulk material character: well-suited for automatic filling stations, easy to handle and dose, easy to gauge the quantity dispensed.
- Vigorous de-dusting during the production process ensures that the product is virtually dust free
- Consistent high quality material
- Low moisture content
- Autoclavable, the physical properties are not altered by the autoclaving process (no clumping!)
- Packaging: autoclavable polypropylene woven bags
- Fit to euro pallets

**Aspen Classic B6**

**Aspen Midi 8/20**
