

EXTENSION OF SHELF LIFE

SDS diets current shelf-life will be extended by 3 months and now deliver a totally of 12 months viability

Results of analysis indicate that the vitamin levels are sufficient to meet the nutritional requirements of the species for which the diet is intended at 12 months from the date of manufacture.

The shelf-life extension is applicable to the following diets

- *CRM (E) & CRM (P) – Rat and Mouse Breeder / short term maintenance.*
- *FD1 (P) & FD2 (P) - Guinea Pig.*
- *RM1 (E) & RM1 (P) – Rat and Mouse Maintenance.*
- *RM1A (P) – Rat and Mouse Maintenance Autoclavable.*
- *RM3 (E) & RM3 (P) – Rat and Mouse Breeding.*
- *RM3A (P) – Rat and Mouse Breeding Autoclavable.*
- *RM6 (P) – Rat and Mouse Maintenance.*
- *SMP (E) & SMP (P) – Mini Pig.*
- *Transbreed (E) – TransBreed*

The extension to shelf-life will be implemented on diets manufactured from the 1st June 2019
