'NEW' Fast Aid 70% IPA Hand Disinfectant Sprays With Added Moisturiser

70% Isopropyl Alcohol Hand Disinfectant With Moisturiser

Kills many viruses and other dangerous organisms.

- Made in the UK to high standards.
- Rapid hand disinfection using professional healthcare standard 70% Isopropyl Alcohol.
- Kills enveloped viruses (COVID-19 family) very quickly.
- IPA is recommended by the World Health Organisation & the UK Government for disinfection of COVID-19 viruses.
- For professional healthcare use - hospitals, clinics, GP practices, dental practices, nursing and care homes.
- For use in the workplace - industry, commerce, retail, agriculture, factories, workshops, offices, emergency services.
- For personal use, both in and away from home. Spray format offers superior performance to gels
- Spray, leave to dry and in 15 seconds the hands will be dry, disinfected and beautifully moisturised.
- Non-sticky and suitable for frequent use.

Available in handy 50ml & 100ml sizes!
