# Product of the Month

Here at LBS we are continually adding to our portfolio to offer the widest variety of products for our customers!

## Procedural Screen Divider

The procedural screen divider was developed by Technicians a couple of years ago. This simple, but effective procedural screen allows you to handle and perform manipulations and procedures without cage mates being able to observe!

As well as being an exceptional 3R device, the screen is designed to be light, portable and foldable – providing easy storage. We currently manufacture the screen in red polycarbonate which reduces the visual stimuli to the animals. It is possible however, to create this screen in other materials. An Autoclavable option will be available in the near future.

The screen is available in a standard size which fits the majority of cages. However, we are able to build bespoke sizes should you wish.

This procedural screen divider can be used on any procedural working surface, it fits inside your change stations, procedural cabinet and isolators!

## Animal Enrichment

Whether it is for Mice, Guinea Pigs, Rats, Ferrets or Rabbits to name a few; LBS have a wide range and just added the products below to our range:

## Cage Liners

Cage liners are a fantastic way of keeping costs down and reducing the time needed to clean and change cages. Thanks to their easy and simple design they can be used for a whole range of purposes within the animal facilities.

For example:

- As a quick and easy replacement during any building refurbishments
- To reduce any contamination and to keep research segregated
  - For quick and easy cage washing and refurbishment

Overall, these products are a fantastic and easy way to reduce costs and speed up cleaning. The liners are manufactured to fit a variety of industry cage sizes.

## Lab Furniture

LBS are able to offer a bespoke service to fabricate a large number of equipment used within animal facilities.

All items can be made completely customisable, from material, height to additional features required!
